

BP FILTER BOX

- BP Filter boxes/ cavities are designed by using specialized techniques to satisfy our customers' unique requirements.
- To reduce weight, filter cavities are machined from lightweight aluminum alloys.
- Unique resonator designs reduce overall size and increase peak power handling.
- Using silver or gold plating on resonators and cavity surfaces, reduces loss than other less expensive plating methods.
- For RF input and output SMA connector housing is provided with 50 ohm matched impedance.

PRODUCT SELECTION GUIDE

Model No. BPF-05-001-S
Size mm (L * W * H). 87.9 * 23.4 * 27.4
Material. Aluminum alloy AA-6061
Surface treatment. Silver plating

Model No. BPF-06-002-S
Size mm (L * W * H). 140 * 27 * 28
Material. Aluminum alloy AA-6061
Surface treatment. Silver plating

Model No. BSF-07-003-G
Size mm (L * W * H). 190 * 50 * 40
Material. Aluminum alloy AA-6061
Surface treatment. Gold plating
